CAREER OBJECTIVE

Aspiring **Java Developer** with strong knowledge of **Spring Framework, Hibernate (JPA), SQL, and frontend technologies (HTML, CSS, JavaScript, React JS)**. Seeking an entry-level role to build scalable full-stack applications, enhance problem-solving skills, and contribute to real-world software development.

• Godavari College Of Engineering BTech in Computer Science & Engineering Percentage: 68%	Jalgaon 2025
• Pratap College HSC: Percentage: 82%	Amalner 2021
• Sane Guruji Nutan Madhyamik Vidyalaya SSC: Percentage: 68%	Amalner 2019

Technical Skills and Soft Skills

- Programming Languages:** Java (core java, Multithreading, Data Structure and Algorithm)
- Frameworks:** Collection Framework, Spring Boot, Spring Data JPA, Spring MVC, Hibernate (JPA)
- Backend Technologies:** JDBC, Servlet, JSP, Hibernate (JPA), REST APIs
- Database:** SQL, PL/SQL, PostgreSQL, MySQL
- Frontend Technologies:** HTML5, CSS3, JavaScript (ES6), React JS, Tailwind CSS, Bootstrap
- Data Formats:** JSON, XML
- Testing:** Manual Testing (SDLC, Testing Concept, Models), API Testing
- Tools & Platforms:** Eclipse, SQL Plus, VS Code, Postman, PostgreSQL, Git, GitHub, STS, Maven, Tomcat.
- Additional Skills:** Strong Communication, Analytical Thinking, Problem Solving, Debugging, Troubleshooting.

Internship

Test Yantra Software Solutions Pvt. Ltd - Developed and debugged Java-based applications during a 7-month internship - Worked with databases to perform CRUD operations and optimize queries - Collaborated with team members to identify and fix bugs, improving application performance - Understanding of HTTP Protocol by creating API Integration between frontend and backend application - Worked in an Agile environment, participating in daily standups and sprint planning meeting.	Jun 2025 - Dec 2025
--	---------------------

Projects

- College Event Management System**
 - Developed **RESTful Web Services** using Spring Boot
 - Implemented CRUD operations for event and user management
 - Added validation and exception handling for secure data processing
 - Tested APIs using Postman
- Real Estate Management System**
 - Built a backend system using Spring Boot, Hibernate (JPA), and PostgreSQL for real estate management.
 - Developed RESTful APIs for property listing, and user management.
 - Implemented complex SQL queries and entity relationships for efficient data handling.
 - Ensured data integrity and transaction management using Spring Boot service layer with `@Transactional`.

Achievements

- Captain, College Kho-Kho Team:** Lead the team to victory at the zonal level, demonstrating strong leadership and teamwork skills. Secured 1st prize in Zonal level Kho-Kho Competition.
- Head of Discipline, CESA:** Managed discipline and ensured smooth conduct of college events for the Computer Engineering Student Association.
- Cultural Activities:** Secured 1st prize in Cultural competition at annual days in college.
- Certificate:** Java Full Stack Developer.
